Rumors Contradicted.—Gov. Cass.—The Globe of Friday extracts the letter from Washington, published in the Baltimore Chronicle, relative to an alleged default of Gov. Cass, and remarks as follows:—"In reply to this insidious Federal calumny, we have only to say, that there is not one particle of truth to furnish even a pretext for such an imputation. We call upon the Chronicle to give the name of the author of the 'letter from a private source at Washington' of undoubted authority, if it would exempt itself from the suspicion of falsifying this sort of colorable proof, to give currency and credit to the scandal. We are authorized from the War Office to state, that the accounts of Gov. Cass with the Department are balanced to a farthing, and that there is not the slightest shadow of doubt in regard to the fairness and squareness of all his accounts with the Government."

# THE WESTERN CAROLINIAN

## SALISBURY:

THURSDAY EVENING, JANUARY 17, 1839.

The Citizens of Salisbury, friendly to the establishment of a Steam Power Factory in this town, are informed that a meeting will be held to consider the subject, on Friday night, (Jan. 19th,) at the house of Mr. Benjamin Fraley.

Mr. JOHN J. BELL, respectfully solicits the support of his friends for the office of Town Constable, for which he is a Candidate for the ensuing year.

We omitted to correct sooner a very important error in the Rev. Dr. Morrison's Report on the Silk Culture. Where it is stated that \$1000 per acre may be reasonably expected, &c., is wrong;—it should be \$100. The Western Carolinian will please notice this correction, as it has published the report.—Charlotte Journal.

The right spirit is at work in North Carolina; we will yet rise from our low estate, and under its operation be redeemed. Manufactures are springing up in every direction,—a new step in the field of enterprise has been lately made, in the establishment of a Woolen Factory in Fayetteville. The fabric is said to be of a good quality. There is no doubt, but that it will become a most profitable branch of enterprise.

COMMON SCHOOLS.  
The action of the Legislature on this very important subject, was of such a character as to break ground, and make a beginning, by throwing the question into a tangible and definite form, such as will ensure its speedy decision; it is returned back to the people themselves, who are now afforded a direct opportunity to express every man his wishes and opinion by vote.—We know nothing more about the bill passed, than the explanation given in the Caption, but will take occasion to speak more of it hereafter: of the priceless value of the system, if it can be carried into effect, in affording to the poor the advantages of education, we need hardly enlarge; it requires no argument to convince any one of the inestimable advantages, and blessings which it would bring to thousands; dissipating the gloom of ignorance and superstition, and shedding abroad throughout the whole land, the light of knowledge; in a government too, like ours, where the people are sovereign, and their will the law, it is plain that the only safeguard of liberty is to be found in enlightened knowledge, and honest patriotism. If we would preserve and secure with permanency, the blessings of free government which we now enjoy, let the light of knowledge be diffused, and despotism and corruption which spring up and flourish only in the darkness of ignorance, will never find an abiding place in our happy country.

FLORIDA.—A Bill is now under consideration in Congress, reported by the Committee on Military Affairs, providing a new plan for clearing Florida of its present troublesome occupants, the Indians; it proposes to grant to white settlers, not exceeding in number ten thousand men, able to bear arms, a bounty of 320 acres of land each, upon specific conditions,—the settlements to be made in such parts of the Territory as are designated; of course, in the contested ground;—to be in stations occupied by not less than forty or more than one hundred men, and not nearer than ten miles to each other;—the settler not permitted, whilst the Indians continue in the Country, to absent himself from his station, except temporarily, unless by permission of the commanding officer of the district, and is required to engage in the cultivation of grain for his support, or sale; rations for one year to be allowed to all south of the latitude of the mouth of the Wythechochee, and ammunition to be furnished them on application;—the stations to be protected by block-houses and stockades, and a general protection to be extended to them by a military force kept in the country.

These are the general and most important details of the bill;—it also provides for the establishment of several land officers, and makes ample and liberal provision for securing patents for lands acquired under the bill.

A "NATIONAL SILK CONVENTION" was held last month in the city of Baltimore.—Delegates were in attendance from eleven States and the District of Columbia, comprising a body of one hundred and seventy-five members of the most respectable, and some of them, distinguished character.—An association to be called the "American Silk Society" was formed, and officers elected.—Resolutions were adopted expressing the opinion of the Convention that the culture of Silk might be profitably prosecuted in all the United States, not only for domestic use, but as a valuable article for commercial export; also recommending the organization of State Societies as auxiliary to the "American Silk Society," and the establishment of a Journal under the auspices of the Executive Committee of the Society, to be devoted to the advancement of the silk cause of the United States.

The Convention recommended to the different States and Territories to choose delegates to meet in Convention on the subject of promoting the Silk Culture, in the City of Washington, in December next, 1839.

VIRGINIA.—The Legislature of this State assembled on Monday the 7th inst. Stafford H. Parker, Esq. was elected Speaker of the Senate, and T. W. Gilmer Esq. Speaker of the House.

It is wonderful how rays of light will sometimes be made by circumstances, to converge suddenly on the point of vision, and illumine the perceptive faculties of men, changing what before this enlightening, appeared horrible mist, a shocking deformity, into comeliness and even beauty: as an illustration, see the altered tone of some gentlemen towards Mr. Rives, of Va.—a little while ago he was a perfect monster, now he is a marvellously proper man and good patriot; and moreover, never was really ugly,—always looked upon as sly, dishonest, bold, &c. We do not pretend to say which of the views is most like this gentleman,—perhaps there are some points of resemblance in each,—we are merely remarking it by way of noting some of the various appearances and shades of coloring which pass over things and persons.

CONVULSION.  
For some of you, we are compelled to omit extracts which should have been made from late Congressional proceedings,—they contain nothing of very particular interest to our readers. Is the Senate the Bill for Granting the price of the Public Lands to yet under consideration; it is expected to pass, with amendments limiting the sales to such as have already settled, or actually intend to do so.

Jan. 5th.—A debate took place on the report and resolution, submitted by a Committee recommending that the front seat of the Eastern gallery be set apart for reporters of distant newspapers;—some pretty hard things were said of the letter writing gentlemen, some of them in a view, not very far from the truth,—it is doubtless the case, that they frequently make the most highly colored party representations, not always in conformity with strict veracity.

Jan. 9th.—Certain resolutions presented by Mr. Benton of Vermont, from the Legislature of his State, denouncing their usual bugbear themes, against the annexation of Texas, in favor of Abolition, and against Atherton's resolutions gave rise to a short and animated debate, on a motion to print them,—the whole matter was finally laid on the table.

In the House, rather more has been done in the way of business for some time past, than at the first of the session.—Mr. Adams, we perceive is yet alive, and as active as ever in his philanthropic exertions, despite the threats of assassination; cart loads of Abolition petitions are regularly presented, but have a very quiet position under the Atherton resolutions.

Mr. Cushman submitted a joint resolution, proposing the State Legislatures for ratification as an amendment to the Constitution of the U. S. the following articles;—that no person shall be capable of being elected to, or holding an office of profit or trust under the general Government of the U. S. who shall hereafter fight a duel, send or accept a challenge, or assist or be knowingly the bearer of a challenge or acceptance.

NORTH-EASTERN BOUNDARY.—This long contested question is about to be finally adjusted.—A London paper states that communications have been for some time made to Mr. Stevenson the American Minister, and the British Government, the result is, a determination to appoint Commissioners to decide upon the question,—and it is probable from mutual recommendations of the parties that the river St. John will be fixed upon as the boundary line between the two countries.

It escaped our recollection to notice before, the proceedings of a public meeting sometime since held in Concord, Cabarrus County, for the purpose of forming a manufacturing company,—by the proceedings published in the "Watchman" we observe that the meeting was addressed by several gentlemen on the comparative superiority of steam over water power, in its application to machinery. The amount of \$10,000 was subscribed in the Capital stock of a company, proposed to be raised for building a steam-factory.

The Memorial of the Internal Improvement Convention to the Legislature will be found in this weeks paper; the importance of the subject is sufficient to commend it to every man's attention, we hope its length will not deter any from carefully reading and considering its recommendations.

From the Caption of the Act &c., passed by the Legislature, which we publish this week, to the exclusion of other matter, it will be seen what business was transacted by that body at their late Session.

New Orleans papers of the 25th ult. contain the particulars of an outrage, which as one remarks "affords an unpleasant illustration of Texian notions of international law, and State Sovereignty."—If our young sister, with a people, but yesterday, as it were, absolved from allegiance to the U. S. laws, begins to play such pranks before she is fairly walking, the prospect is bad in the contemplation of her future matured power, and strength,—we expect, of course, that reparation has been demanded by the Gov. of Louisiana.—The particulars of the insult as given are;—that an armed force consisting of about one hundred men under the command of Gen. Rusk, had entered the village of Shreveport, in the territory of the U. S. and threatened the lives of many citizens,—stating as a reason for the invasion, that they were in pursuit of some Caddo Indians, whom they had come to disarm,—they did so, and threatened the Indian Agent at Shreveport for having furnished them arms and ammunition.—"Gen. Rusk, we learn," says the account "stated that he came with no hostile intention toward the Citizens of the U. S. States," but in pursuit of the Indians, who had crossed into Texas, and warred against the Citizens.

OHIO.—Benjamin Tappan (Adm.) has been elected by the Legislature of this State, United States Senator, to occupy the place of Mr. Morris, the present incumbent, at the expiration of his term. This may be considered by the South as a very happy change, as Mr. Tappan entirely repudiates, and has avowed himself as utterly opposed to Abolition, we are pleased that he has superseded Morris, who is one of the band of fanatical agitators.

TEXAS.—Late advices state that a commercial arrangement has been effected between France and Texas, whereby the ports of the two countries are open to the vessels and products of each other. It will be recollected that a similar arrangement was concluded some time since with Great Britain, so that the amicable relations existing between Texas and these two Governments, give promise of a more formal recognition by them, of the independence of that Republic. The solitary star seems to be in the ascendant.

The New Orleans Banks resumed specie payment on the 24th ult.

FREE BANKING.—The following are the principal provisions in the bill authorizing free banking, passed by the Georgia Legislature at its late Session.

That associations may be formed for banking purposes, by securing the capital stock of each company by deposits of State stock equal to the amount of the capital, or by deposit of bonds and mortgages on improved real estate equal to twice the amount, or by securing the stock on freehold and slave property equal to four times the amount of the capital. Objections to the use of negro property were made, but did not prevail. An unsuccessful attempt was also made to add a provision forbidding loans to stockholders, but they are prohibited from borrowing on pledge of stock, and are required to give the usual collateral security, which must not be the name of a director or officer of the bank.

The associations are required to have in their vaults twenty five per cent of the capital amount in gold or silver; and the amount of capital may be fixed at the discretion of the companies; no limit being established by the bill. On refusal of specie payment, a dividend of eighteen per cent may be recovered. The limit of these associations and the branches must be restricted by the banks on the settlements between them; and the limit must at no time, for two years of the association, exceed the fourth part of the amount of the capital of the banks in specie. An attempt to make the associations the right to repeal the bill, and to make the associations should come to pass.

From the New Orleans Bee, January 1.  
IMPORTANT FROM MEXICO.  
The brig *Academe*, which arrived last evening from Laguna, which also left on the 16th December, brings interesting intelligence derived from the British Minister, Pina, from San Antonio, then at Laguna. From this source we learn that the town of Vera Cruz has been taken by the French, after a bombardment. The Mexican General Arias, was taken prisoner by the French, and Gen. Santa Anna was so grievously wounded as to render necessary the amputation of a leg.

The Mexican government, not willing to recognize the treaty entered into between Admiral Spaulding and General Rincon, and having declared war upon the French government, General Santa Anna placed himself at the head of 5000 men, and entered Vera Cruz in spite of the treaty. Admiral Spaulding having learned that Santa Anna was advancing towards the city, sent a number of boats filled with troops with orders to attack the cannon of the batteries at Vera Cruz. While the boats were engaged in this labor, the Mexicans were seen, and slaughtered a considerable number of soldiers and sailors.

The French were compelled to retreat to a small squadron, which opened a heavy fire upon the boats, and lodged the Mexicans, and took possession of the city. We have been unable to ascertain the exact result of the battle.

The Cotton Crop.—The New Orleans Bee estimates the present crop at 1,350,000 bales; as follows:  
Virginia and North Carolina, 500,000  
South Carolina and Georgia, 450,000  
Florida, 100,000  
South Alabama, 250,000  
Lower Valley of the Mississippi, 500,000  
Tennessee and Alabama, 500,000  
1,350,000  
The Bee estimates the consumption in Europe at 1,350,000—total, 1,621,000 bales. It advises planters to hold back for better prices, which would certainly be good advice if any reliance could be placed on the above estimate of the crop.

[From our Correspondence.]  
FAYETTEVILLE, Jan. 13, 1839.  
Business has somewhat revived again: Cotton is still improving in price; Flour has sold, to-day, at \$1.60 cts. per bushel; Wheat for shipping, has changed hands this week at \$1.40 cts. per bushel; Flour, \$2.50, 7 a 7.50 per bbl. although some sales for cash, have been made from waggon, at 25 cts. less. Corn, 50 cts. Oats, 45 a 50; Pork, 7 a 8. No sales Tobacco to report: several auction sales, embracing dry goods, ready made clothing, shoes, &c. &c.  
Our market being well supplied with Molasses and Salt, by the late arrival, a decline in the prices of these articles has followed:—We quote Molasses, 37½ a 43; Salt, 50 75 a 3 p. sack. Some sack salt in lots, to the trade, has changed hands at \$2 02½.  
Arrived on Tuesday of this week, steamer *Hennipet*, Capt. Rush, with boats *Diligence*, *Post Boy* and *Wagoner* in tow, having about 1,100 sacks Salt for this market, together with dry goods, groceries, &c., &c., for merchants here and the interior. Also, a steam engine for a Factory in Davis county. The *Hennipet* left on Thursday with Flour, Wheat, Flaxseed, Cotton, and cotton Yarn, shipped by merchants here. Our river is in good order for boating: The boat *Glasgow*, of R. O. Haulon's line, left this evening, with full freight on above.

Many of our citizens speak with much confidence as regards the Fayetteville and Western Rail-Road, since the amendment of the charter.  
Miss Davenport, the celebrated actress, has been defying the play-goers, at the Theatre, for two or three nights past. She makes her last appearance to-night.
